Each of the control units having a real time area set up for execution of a real time capable operating system and having a non-real time area for execution of non-real time capable operating system, where real time areas of the control units process movement-relevant control signals sent to the real time capable operating system and are directly suitable for the motion control of the respective one of the manipulators. The control units further using the non-real time areas to perform non-real time processing of non-movement relevant control signals.
